

Hospital Opioid Self - Assessment Tool & Instructions – SAMPLE

Overview:

Purpose:

The purpose of this self – assessment tool is to evaluate your internal processes and provide best practice resources related to opioid screening and prescribing, dispensing and administration, monitoring and management and discontinuance and prevention of drug diversion. It will help you identify your strengths, areas of opportunity to enhance patient care and reduce your potential liability.

Instructions for Completing the Self- Assessment:

- Scoring:
 - Met = 1 – you must meet every element in the question.
 - Not Met =0
 - N/A = not applicable
- Resource:
The resource number listed next to the question is located within the Resource Section at the end of the self- assessment tool.
- Comment Section:
This section can be used to make notes for follow- up.
